1 Feature matching and deformation for texture synthesis

Qing Wu, Yizhou Yu
August 2004 **SIGGRAPH '04:** ACM SIGGRAPH 2004 Papers
Publisher: ACM

Additional Information: full citation, abstract, references, cited by, index terms

Full text available: 🔲 pdf(448.53 KB) ◎ mov(18:47 MIN)

One significant problem in patch-based texture synthesis is the presence of broken features at the boundary of adjacent patches. The reason is that optimization schemes for patch merging may fail when neighborhood search cannot find satisfactory candidates ...

Keywords: Distance Transforms, Image Registration, Oriented Features, Texture Warping

2 Hardware accelerated per-pixel displacement mapping

Johannes Hirche, Alexander Ehlert, Stefan Guthe, Michael Doggett
May 2004 **GI '04:** Proceedings of Graphics Interface 2004
Publisher: Canadian Human-Computer Communications Society

Full text available: 🔲 pdf(308.64 KB)   Additional Information: full citation, abstract, references, cited by

In this paper we present an algorithm capable of rendering a displacement mapped triangle mesh interactively on latest GPUs. The algorithm uses only pixel shaders and does not rely on adaptively adding geometry. All sampling of the displacement map takes ...

3 Level-of-detail volume rendering via 3D textures

Manfred Weiler, Rüdiger Westermann, Chuck Hansen, Kurt Zimmermann, Thomas Ertl
October 2000 **VVS '00:** Proceedings of the 2000 IEEE symposium on Volume visualization
Publisher: ACM

Full text available: 🔲 pdf(1.04 MB)   Additional Information: full citation, references, cited by, index terms

4 Efficient editing of aged object textures

Olivier Clément, Jocelyn Benoit, Eric Paquette
October 2007 **AFRIGRAPH '07:** Proceedings of the 5th international conference

Google
